

Investor Presentation

Master Credit Facility

A \$300M revolving capital engine built to deploy up to \$5 billion in disaster-resistant community housing — at scale, on mission.

The Opportunity

▣ Housing Shortage

Millions of families locked out of homeownership by down payment barriers and▣▣ disaster-resilient inventory

The \$300M Master Credit Facility

\$300M

The Capital Recycling Model

Year 1

\$300M deployed into SPEs across multiple counties. Homes break ground fully funded at 110%.

Financial Mechanics

110% Pre-Funding

Each home fully funded before ground break — includes 10% contingency reserve. Zero schedule disruption.

Per-Home Economics

\$250K

Risk Mitigation: SPE Structure

- Each county operates its own Special Purpose Entity — legally isolated from all others
- A challenge in County A cannot compromise collateral in County B or the master facility
- Vertically integrated subsidiaries control manufacturing, distribution & construction
- Local General Contractors employed by county via Vertikal Builders Alliance
- Strict control over timelines, costs, and quality — no reliance on third-party developers
- ~1,200 homes targeted simultaneously across multiple states

The Product: ICF Intelligent Homes

❑ Disaster Resilient

Insulated Concrete Forms (ICF) exceed building codes — withstand hurricanes, tornadoes, fires & earthquakes

Community Impact & Mission

\$0 Down Payment

Subsidies, grants & developer credits eliminate the single biggest homeownership barrier

Investment Thesis**5-Year Maturity Options**

- **Full Repayment** — Return of principal at end of 5-year term
- **Equity Conversion** — Convert principal into equity shares of the SPV
- **Term Extension** — Extend participation for an additional term

**Target: 20,000 homes · 5 states · \$5B
cumulative deployment**
